SKILLS

Languages

Java, Python, JavaScript, SQL, C#/.NET, C++, HTML/CSS

Frameworks & Libraries

React, Node.js, .NET WinForms, Java Swing, pandas, matplotlib, Tkinter

Databases

SQLite, MySQL, SQL Server

Dev Tools

Git/GitHub, GitHub Actions, Visual Studio, VS Code, IntelliJ/Rider, Linux CLI

Security

Wireshark, Snort IDS, Security Onion, iptables, Sysinternals

Embedded

Arduino Mega 2560, ESP32, TinkerCad

EDUCATION

B.S. Software Development
DeVry University

A.S. Engineering Technology
DeVry University

Tech. Diploma — Computer Programming
DeVry University

Tech. Diploma — Network

SUMMARY

Software developer with a B.S. in Software Development and hands-on experience across full-stack development, embedded systems, data engineering, and cybersecurity. Background in fintech operations at U.S. Bank brings strong analytical skills, accuracy, and a compliance mindset to every project. Seeking remote entry-level developer roles.

SELECTED PROJECTS

Weather Data Collection & Analysis

Python · SQLite · pandas · matplotlib · noaa-sdk

- Built a multi-script data pipeline that fetched 14 days of hourly NOAA observations (404 rows) into SQLite with fields for temperature, wind, humidity, pressure, and visibility
- Wrote SQL queries via pandas, converted Celsius to Fahrenheit, and generated matplotlib line, box, histogram, and comparative visualizations

Data Structures & Algorithms Benchmark Suite

Python

- Implemented ArrayList, LinkedList, and Binary Search Tree from scratch; benchmarked six sorting and two search algorithms across datasets from 100 to 100,000 records
- Simulated an Automatic Call Distributor using a Queue with random routing and real-time queue tracking

Cybersecurity Infrastructure Project

Wireshark · Snort · Security Onion · iptables · Sysinternals

- Analyzed packet captures for OS fingerprinting and port scan detection; configured Snort IDS with custom rules verified through Security Onion
- Built iptables firewall with time-based rules, NAT, and DMZ routing; performed live memory analysis on Windows and Linux VMs

Smart Home Automation & Monitoring

C++ · Arduino IDE · TinkerCad

- Wired and programmed three independent sensor modules on an Arduino Mega 2560: a door sensor with LED/buzzer alerts, an ultrasonic distance sensor with proximity scaling, and a photoresistor-driven light
- Validated circuits in TinkerCad before physical build; integrated all modules into a single coordinated sketch

PROFESSIONAL EXPERIENCE

Cash Logistics Analyst — Dec 2025 – Present

U.S. Bank · St. Paul, MN

- Analyze cash logistics data to support operational decision-making across vault and teller network

Cash Vault Operations Processor — Jun 2024 – Dec 2025

U.S. Bank · St. Paul, MN

- Processed high-volume cash vault transactions with accuracy and compliance in a regulated fintech environment
- Used internal banking systems and Microsoft Excel for reporting, reconciliation,

Tech. Diploma — Network Administration
Lake Superior College

Tech. Diploma — Cybersecurity
Lake Superior College

and data tracking

Vault Teller
Oct 2022 – May 2024

U.S. Bancorp · Duluth, MN

- Managed vault operations, cash handling, and transaction processing with strict accuracy standards
